Dear Curator or Director,

I am a painter and printmaker, having had many experiences artistically and personally, from early life as a monk, through exhibiting extensively, to interacting with thousands of college students teaching Studio Art and Art Appreciation. The purpose of this letter is to propose an exhibition, focused on expanding, if not countermanding, the current trajectories of Art. The title of the proposed exhibition is "Art Can Be Philosophical & Poetic".

The most powerful current concerns of Art, as seen in periodicals, journals, and museum exhibits are analyses of what Art is, social justice themes, entertainment, money, and status (<https://www.researchgate.net/topic/Contemporary-Art>). All of these have a say of course in the overall picture of Art. However, the depth of philosophical dialectic that permeates the history of Art is astonishingly missing. The quests of Donatello, Leonardo da Vinci, Raphael, Michelangelo, Kandinsky, Kupka, Malevich, and Mondrian are no more as prominent as they deserve. Whereas Art often probed the meaning of "What is life about?" "Who am I?" "How can I contribute to society?"—now these vital anxieties are largely ignored at the deepest levels. Not only that, but the tradition of metaphor/poetry has been neglected for positivistic gestalt.

To present work that challenges the community to think critically about the issues it addresses, work that is innovative, that foregrounds process and/or conceptual concerns—these goals we likely share. Philosophical thinking is at the center of critical dialog, and a deeper perception of and solutions to contemporary problems will certainly challenge thinking, dialog, and imagination.

I hope I can work with you to present this exhibition. Educational materials, lectures, or seminars could be included. I think it would be a compelling time for all.

Sincerely  
Robert Stanley

---

## Exhibition Synopsis

### "Art Can Be Philosophical"

Combining a Humanities course I taught, "Modern Culture and the Arts," with my art practice and studio courses, creates insights that I would like to share with others. I propose a one person exhibit of my work on themes often neglected, but of great concern: "Art Can Be Philosophical and Poetic."

"Who are we?" That fundamental concept begs for penetrating and exploring inquiry, as well as expanding into how our communality can move us beyond divisiveness, towards authentic cultural production. The purpose of this exhibition is to deepen our understanding of personal and communal identity, and to gain new experiences from the esthetics of visual expression. My pieces flow through the knowledge of sociology, science, philosophy and art to a balanced understanding of being a person and contributing to the world

The most powerful current concerns of Art, as seen in periodicals, journals, and museum exhibits are analyses of what Art is, are social justice themes, entertainment, money, and status (<https://www.researchgate.net/topic/Contemporary-Art>). All of these have a say of course in the overall picture of Art. However, the depth of philosophical dialectic that permeates the history of Art is astonishingly missing. The quests of Donatello, Leonardo da Vinci, Raphael, Michelangelo, Kandinsky, Kupka, Malevich, and Mondrian are no more as prominent as they deserve. Whereas Art often probed the meaning of "What is life about?" "Who am I?" "How can I contribute to society?"—now these vital anxieties are largely ignored at the deepest levels.

Museums and galleries likely want to present work that challenges the community to think critically about the issues it addresses, work that is innovative, that foregrounds process and/or conceptual concerns. Philosophical thinking is at the center of critical dialog, and a deeper perception of and solutions to attendant problems will certainly challenge thinking, dialog, and imagination. The art proposed for this exhibition accepts the fragmentation in modern life. It is a visual reflection of the human urge to answer the questions of identity (who am I?), meaning (why are we?), and action (what should we do?).

The art is philosophical/poetic, revealing and wondering at the things conceptual and emotional, beyond usual horizons.

In the artworks of this proposed exhibition are images of people, nature, objects, spaces, and dissonances—all containing forces, often not obvious, that stream through the world, that can unite us in our shared humanity.

The works include the now and the infinite, the bold and the shy, the joyous and the sad, and the light and the dark, our deepest shared identity. The goal is to engage the viewer in deep looking, personally, communally, and esthetically, hoping for a synthesis that brings together the various forces we encounter so that a better world, for self and others, will be created.

# \_\_\_\_\_Statement

My works jostle images of contemporary and timeless people, nature, science, and abstract thinking and emotions. They reflect diverse influences, such as the artists Johns, Cornell, Diebenkorn, Sally Mann, and Bill Viola, as well as biologist E.O. Wilson and philosopher Heraclitus. It dances between chaos and order, as does the world.

Energies, often unnoticed, flow in this world. For example, the northern lights glow because of forces we cannot see. Prairies in the Midwest were once under an ocean, and before that were mountains. These hidden energies continue to this day, stimulating the world.

Hidden forces flow through humans, too. Enigmatic currents bring people together or separate them, bring desperation, or give meaning to life.

Objects, spaces, and dissonances in my works are full of emotion, order, and enigma.

# Bio

Robert Stanley is a painter and computer artist based in the Chicago area.

Although born in Florida to artistic parents, an Army Air Corps father who liked to draw and a mother who had won voice competitions, he did not do anything artistic until becoming a monk, where the Arts were introduced to young candidates. He got his undergraduate degree at the University of Dayton, then taught in Cleveland and Cincinnati, exhibiting in these cities.

After several years, he left the religious Order, teaching at the University of Dayton and Earlham College for a year. Realizing that he needed a tenure-track college position to be able to have enough time to focus on making art, he received a Master's degree from Pratt Institute in New York.

He has exhibited artworks around the USA and Europe, while teaching college in Pennsylvania and Illinois, including The William Penn Museum in Harrisburg PA, Musée d'Art Contemporain, Chamaliere, France, Midwest Museum of Art, The Brauer Museum, Ft. Wayne Museum of Art, Koehnline Museum, Hyde Park Art Center, and Evanston (IL) Art Center.

His artwork has been written about in 2001 International Digital Art Awards, L'Association Musée D'Art Contemporain "Une Brève et Ample Énonciation," the Koehnline Museum of Art's Artwalk at Oakton, the Chicago Tribune, and The New Art Examiner.

Brauer Museum Curator Gregg Hertzlieb wrote that the work "sets up a dialogue between observation and invention, realism and abstraction that grows into a lively, even stormy exchange."

The trajectory of his work has developed over the years. The first major series explored open doorways, inspired by a glance out his office door at the University of Dayton, to catch sight of a noise. The hall was empty, but the idea of something unknown having just happened remained. Later work, keeping the same concept of something unknown, revolved around borders beyond what can be seen, and on to chaotic connections.

Recent pieces spread people, places, and events around the canvas, the center left open, wondering about connections. The viewer is invited to work out relationships between the objects, and between himself and the art.

Stanley's influences are broad: Johns, Kandinsky, Diebenkorn, Sally Mann, and Bill Viola, as well as biologist E.O. Wilson and physicist Edward Lorenz. The compositions evoke a disjointed world, yet connections between objects are suggested, enigmas in the chaos of life.

Now living near Chicago in a wooded area along the lake, he combines images of people, the city, and nature in personal and thoughtful adventures.

Dear Mr. Stanley,

I thank you for sending slides, statement, and good letter. Although I'm never really certain what I'm looking at in a slide they seem clear, vivid, and surprising in their spatiality. They also seem to have a note of what is contained in your Thoughts on Art which is a freshly stated affirmation of "Idealism". As I gather you surmise, my sympathies are somewhere in that area also.

I wish you success in the continuance of your art.

Sincerely,

Richard Diebenkorn

Letter of recommendation

I curated an exhibition of Robert Stanley's work at the Brauer Museum of Art that ran from May 17 to August 11, 2013. During the planning of that exhibition, I worked closely with Stanley and found him to be a true professional, confident and organized in his pursuits.

Stanley and I have known each other for many years, and during that time I have admired his inquisitiveness and relentless pursuit of visual expressions related essentially to his life and ideas. He is generous in sharing his insights, encouraging others, and considering varied points of view. I believe that all who saw his career overview exhibition at the Brauer Museum came away with the impression of Stanley as an artist committed to exploring art history and weaving together such references in complex ways with his own biography.

Stanley's work is conceptual in its surreal juxtapositions and reflections on aesthetics. The pieces are seductive and atmospheric in their appearance, leading the viewer to ponder the literally and figuratively abstract concerns that lie at their heart. Stanley joins other artists who chiefly in the second half of the twentieth century potently blended visual and conceptual aspects so that viewers could engage the pieces on both levels; his works refer to modes of representation, as well as means of execution, at the same time that they speak to a firm awareness of formal criteria.

We are pleased to have a work by Stanley in the Brauer's permanent collection, and I recommend him highly as he investigates creative challenges and opportunities for himself.

Sincerely,

Gregg Hertzlieb, Director/ Curator  
Brauer Museum of Art, Valparaiso University

May 11, 2015

**Letter of recommendation**

I met Robert Stanley when I joined Oakton Community College in 1998. I had followed his successful career as an art professor and as an artist since then. I also had the opportunity to curate Stanley's exhibition *Bracketed* at the Koehnlne Museum of Art in 2002. He is also represented in the museum's permanent collection by the print *Sin a Ma* and the painting *Offshore*.

Stanley's art is inspired by his surroundings, especially their hidden, ordering motifs. His unique works in acrylics and computer prints reflect influences such as Wassily Kandinsky (1866-1944), Joseph Cornell (1903-1972), Richard Diebenkorn (1922-1993), Sally Mann (b. 1951), and Bill Viola (b. 1951), as well as biologist Edward O. Wilson (b. 1929) and physicist Werner Heisenberg (1901-1976). The spaces and dissonances among the figures, dream images, landscapes, studio, and sub-atomic worlds in these works suggest order and enigma. I truly recommend Robert Stanley for any artistic venture.

Dr. Nathan Harpaz

Manager and Curator  
Koehnlne Museum of Art

## List of ARTWORKS

1. *City #2, printing ink on paper, 15 x 23 in., 1962*
2. *Hallway, acrylic on canvas 42 x 38 in., 1968*
3. *Man Walking-Unpainted, acrylic on canvas, 36 x 40 in., 1971*
4. *Four, acrylic enamel and turpentine offset collage on canvas, 34 x 42 in., 1972*
5. *Eyegates Study, acrylic on canvaspaper, 12 X 16 in., 1979*
6. *Fossils of the Thought, acrylic on canvas, 36 x 44 in., 1982*
7. *Traces-1982, acrylic on canvas, 36 x 48 in., 1982*
8. *Time Prism 2/25, computer Cibachrome print, 8 x 10 in., 1985*
9. *Earth Comforter, archival computer print (ed. 50), 12 x 16 in., 1988*
10. *Birth Edge, acrylic on canvas, 36 x 48 in., 1989*
11. *Hidden, archival computer print (ed. 50), 12 x 16 in., 1990*
12. *Fruit and Paper, colored pencil on paper, 9 x 6 in., 1993*
13. *Postmodern Playground, archival computer print (ed. 50), 12 x 16 in., 1994*
14. *Study: Investigation, watercolor & pencil on paper, 8 x 10 in., 1996*
15. *Vision Narratives, archival computer print (ed. 50), 12 x 16 in. or 24 x 32 in., 1996*
16. *Mind 2/50, archival computer print, 16 x 12 in, 1997*
17. *States of Grace, acrylic, and wood on canvas, 24 x 20 in., 1998*
18. *Thinking, acrylic on canvas, 36 x 48 in., 2002*
19. *Elation, acrylic on canvas, 24 x 36 in., 2004*
20. *A Momentary Glance B.A.T., archival computer print (ed. 50), 12 x 12 in, 2004*
21. *Senses, oil on canvas, 24 x 24 in, 2008*
22. *In Medio Stat, pastel, ink, collage, acrylic on paper, 14 x 11 in., 2008*
23. *Delineations, acrylic, charcoal, and collage on canvas, 24 x 20 in., 2009*
24. *I Am Smiling, acrylic, charcoal, collage on canvas, 24 x 24 in., 2009*
25. *Resources, acrylic, charcoal, colored pencil on canvas, 48 x 36 in., 2009*
26. *A Survey, ink on paper, 22 x 28 in., 2010*
27. *Awakened by the Light, ink on paper (computer monoprint), 28 x 22 in., 2011*
28. *Shadows Not Socratic, acrylic and leaf on canvas, 36 x 48 in., 2011*
29. *The State of Being, acrylic pencil ink paper on canvas, 36 x 48 in., 2012\*
30. *Las Meninas , acrylic and collage on canvas, 48 x 36 in., 2009*

## Proposal: ART Can Be PHILOSOPHICAL & POETIC

*City #2, printing ink on paper, 15 x 23 in., 1962*

As an art student, Existential questions about “the meaning of life” and such were discussed. Although the understanding of Philosophy was not very developed, this early piece got down to the question of order or chaos, underlying themes of Philosophy and thought.

Is there an order and plan to the world I observe, or is it random and accidental? *City #2*

*Kline Vawdavitch*

asks, and answers that question, in a way quite different from other artists at the time, such as Franz Kline.

*Hallway, acrylic on canvas 42 x 38 in., 1968*

Another key question is “What is real?” From student philosophical discussion to the highest echelon of philosophers and questioners of humanity, the battle between subjectivity and objectivity is ongoing. *Hallway* suggests a possibility to reconcile the two.

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Man Walking-Unpainted, acrylic on canvas, 36 x 40 in., 1971*

The problem of thinking in a solitary way is that what is arrived at may seem great as a system, yet may have a weak connection to the real world of molecules and human emotions.

Also, relativity remains. The truth varies depending on your position. Standing still, we can be said to be not in motion. Yet, an observer on the moon would see us traveling in a circle at roughly 1,000 MPH.

Truth beyond truth and relativity are in play.

*Four, acrylic enamel and turpentine offset collage on canvas, 34 x 42 in., 1972*

However, focusing on just the material does not provide full answers or even good questions. That is why *Four* puts Rauschenberg's techniques and subjects in a field of random flow, suggesting, on the right side of the canvas, going through an enlightened doorway, to an area of the yet unknown—a deep thinking response rather than an immediate reaction.

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Eyegates Study, acrylic on canvaspaper, 12 X 16 in., 1979*

Nature however, in all aspects including man (Emerson) and those creations, does provide answers and good questions. A common ground of similarities in the flow of existence since time happened and a keen attention to the wisdom of nature's survival and thriving do reveal why we are here and where one is to go. Not easily nor with absolute certainty, but certainly as solidly as any recognized philosophy.

*Fossils of the Thought, acrylic on canvas, 36 x 44 in., 1982*

By looking at the forces, both chaotic and orderly, that have generated space, time, and our current existence we understand more deeply what we know. *Fossils of the Thought* hints at the forces just beyond the boundaries of our common knowledge, forces which forge our world and are the basis of the great philosophical and personal questions.

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Traces-1982, acrylic on canvas, 36 x 48 in., 1982*

Even so, we remain doubtful of the fullness of any answer/symbol, whether Art or philosophical. Harkening to Jasper Johns, the marks we make are approximations or metaphors for the true matter of existence, which straddles the physicality of matter and the metaphor of poetry, because neither one nor the other can completely grasp answers to the great questions.

*Time Prism 2/25, computer Cibachrome print, 8 x 10 in., 1985*

A fine way for Art to represent this attempt to synchronize randomness and order is computer art. In *Time Prism*, both randomness and order are represented, the questions asked, and perhaps answered.

Proposal: ART Can Be PHILOSOPHICAL & POETIC

Another way of representing the explicit ordering of the random flow of the universe. The actual cause is an open question here.

*Earth Comforter, archival computer print (ed. 50), 12 x 16 in., 1988*

The actual Physics is known, of star formation, which leads to complex chemicals, which after novae lead to life on a planet. Still, even the mechanics are amazing, and open the question whether these progenitors of consciousness are still a foundation of reasoning that leads to knowledge, then understanding, and finally wisdom.

*Birth Edge, acrylic on canvas, 36 x 48 in., 1989*

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Hidden, archival computer print (ed. 50), 12 x 16 in., 1990*

Another look at order arising from the random flow of matter and energy.

"In art, and in the higher ranges of science, there is a feeling of harmony which underlies all endeavor. There is no true greatness in art or science without that sense of harmony."  
Albert Einstein

This includes Philosophy.

*Fruit and Paper, colored pencil on paper, 9 x 6 in., 1993*

The universe can be seen also in the simplest things. The lesson of what something seems from one angle being incomplete was first presented in plastic space by the Cubists. They were aware how the modern world let us see so many more viewpoints. What was revealed about physicality is also true of perception, and what we make of it. Such cognitions are often not central, but off to the side, through another door, past our normal boundaries.

*Postmodern Playground, archival computer print (ed. 50), 12 x 16 in., 1994*

This seeing and cognition of differing aspects is not the same as the relativism of Postmodernism, where there is no objective focus possible, just a slanted interpretation of the individual viewer. That is relativism, quite different from the relativity of fingering the viewpoint from which you perceive something. We may be not moving or moving at 1000 MPH depending on the viewpoint; you cannot say we are bouncing up and down just because it may be your interpretation.

*Study: Investigation, watercolor & pencil on paper, 8 x 10 in., 1996*

Still, that does not mean that to see answers to big questions, you should avoid looking in new ways. The Zen admonition "see like a rock" suggests this, as does the watercolor *Study: Investigation*.

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Vision Narratives,*  
archival computer print (ed. 50), 12 x 16 in. or 24 x 32 in., 1996

A consideration of Plato's Cave, brought up to date for our self-conscious society. The person, sitting and thinking, is himself a shadow, a construct. Over his shoulder subconscious urgings push in unknown directions. Meanwhile, he looks in on himself, taking a mental picture of his mental processes. Rooted in the Philosophical field of Epistemology, of knowing what is true, "Vision Narratives" carries a warning of the need for humility and intense awareness.

*Mind 2/50,* archival computer print, 16 x 12 in, 1997

A mind might stand a chance of observing reality if, rising from contemplating against a background of Heraclitus' understanding that everything is in flux ("You can never step into the same river twice"), a picture is painted realizing that past memories and emotions are affecting it.

Proposal: ART Can Be PHILOSOPHICAL & POETIC

“Seeing like a rock” does not mean stopping at the surface, but seeing what is really there, honestly, at every stage of searching for further relationships and causes.

*States of Grace,*  
acrylic, and wood on canvas, 24 x 20 in., 1998

The remainder of the artworks present the artist/viewer in the midst of the flow of various aspects of time, milieu, and thinking about them.

*Thinking,* acrylic on canvas, 36 x 48 in., 2002

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Elation, acrylic on canvas, 24 x 36 in., 2004*

*A Momentary Glance B.A.T., archival computer print (ed. 50), 12 x 12 in, 2004*

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Senses, oil on canvas, 24 x 24 in, 2008*

*In Medio Stat,  
pastel, ink, collage, acrylic on paper, 14 x 11 in., 2008*

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Delineations,*  
acrylic, charcoal, and collage on canvas, 24 x 20 in., 2009

*I Am Smiling,*  
acrylic, charcoal, collage on canvas, 24 x 24 in., 2009

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Resources, acrylic, charcoal, colored pencil on canvas, 48 x 36 in., 2009*

*A Survey, ink on paper, 22 x 28 in., 2010*

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*Awakened by the Light, ink on paper (computer monoprint), 28 x 22 in., 2011*

*Shadows Not Socratic, acrylic and leaf on canvas, 36 x 48 in., 2011*

Proposal: ART Can Be PHILOSOPHICAL & POETIC

*The State of Being*, acrylic pencil ink paper on canvas, 36 x 48 in., 2012

*Las Meninas*, acrylic and collage on canvas, 48 x 36 in., 2009

The artist as observer of and presenter of meaning, as a philosopher of sorts, has a long tradition. In *Las Meninas* a comparison is made between the constraints of observation centuries ago, in Velasquez time and the early 21st century.

His *Las Meninas* places the artist in social strata, and constrains enlightenment to a few, notably the man going to a lighted room through the door on the right.

Using the same proportions, my artist is in the flow, painting a vaguely delineated, changing canvas, with a backdrop of humanity swimming in the flow, along with the Cosmos. Heraclitus was right: "You cannot swim in the same river twice."

# Press

"...see multiculturalism, politicization, self-expression, and estheticism as a Hindu might, as maya, illusion. Instead of illusion, they seek the implicative nature of the universe. They announce a subtle but profound change in Art. Cosmos lies within chaos."

*Catalog of the Troisieme Triennale Mondiale D'Estampes, 1994*

"This retrospective exhibit of the well-known Des Plaines artist's work is designed to present "an overview of how a vision evolves and an artist changes in body, mind and technique." Robert has exhibited in Chicago, Indiana, New York, Oregon, and Pennsylvania, and recently won an international competition for a solo show at the Museum of Contemporary Art in Chamalieres, France, during that facility's Fifth World Triennial. Robert says his work reflects that both physical and emotional energies, beyond our usual sensations, affect our world."

*The Canvas: A Quarterly of the Contemporary Art Center of Peoria, Summer 1998*

An installation that revolves around perceiving, picturing, journeying, stories, nature, and expression – the fragments from which we make meaning in our lives. Remnants of stone structures are scattered about. On these shards are bits of stories and poetry. Floating frames create random fragments of sky, field, and woods. A 4 x 4 foot artwork, itself made up of scraps of an artist and his vision, contains a partial view of the field behind it. Participants, as they look around, can take in all these fragments, sensing what is around them and in them. They can read, and add to if they wish, the comments of others which are kept in a box. All the ones plus ones plus ones add up to a rich, but tentative, One.

*1 + 1 = ONE Catalog, 2001*

"Bracketed," the last piece in the show. is a computer study that takes its inspiration from pieces first created by the artist in several other mediums, including a sketch, sculpture and oil painting.

"It's a bringing together of a bunch of elements," the artist explained. "You don't know if there's order in them. I used to believe there's order in the chaos. Now, I'm not so sure."

In a section of the exhibit called "Kinship," the artist again created similar pieces using the two mediums. Three works highlight the differences of approaching a similar subject - in this is case an artist's struggle to capture what he sees on canvas - in two media.

*Myra Petlicki, Pioneer Press, Thursday, June 27, 2002*

MIRCA Art Group, an international association of artists, invited Robert to be in an exhibition recognizing Malala Yousafzai in Skogas, Sweden, from Aug. 29 through Oct. 24, 2015.

He writes, "For the exhibition, I created a poster depicting Yousafzai, with references to her suffering and those who supported her, and her words, 'Let us make our future now, and let us make our dreams tomorrow's reality.'"
